*Min. Aliquot = Smallest dispensable volume/tip.
**Min. Increment = Lowest incremental adjustment/tip.

Applications

- PCR
- ELISA
- NGS
- Flow cytometry
- Enzyme assays
- Cell-based assays
- Protein concentration
- Liquid chromatography
- Phage display
- Protein extraction
- DNA/ RNA extraction
- Protein concentration
- Sample prep
- Assay setup
- Reagent setup
- Kit productions
- Plasma prep
- Format transfer

Note: Additional applications, vessels and samples may work well with NanoRep. Examples listed are for illustrative purposes only.

Specialty Pipettes

Exquisitely Precise Pipetting No Touch Off Dispense

Dispense 100 Nanoliters

Dispense as little as 100 nL, the world's smallest aliquot from a handheld device. A positive-displacement system with adjustable speed, NanoRep capably handles any liquid – from aqueous and viscous to volatile or dense.

Avoid Contamination

No Touch Off™ dispense speeds workflows and reduces contamination risk by eliminating the need to touch the vessel wall after dispensing.

Simple Operation

The high-clarity color screen and intuitive joystick control make setting up protocols easy. Choose manual or automatic dispense, adjust aspiration and dispense speeds, and save protocols to repeat or edit later.

Rainin NanoRep Electronic Repeater Pipette

With the Rainin NanoRep, life science researchers can accurately repeat-dispense biological solutions even at nanoliter volumes, meeting the growing demand for assay optimization and miniaturization. NanoRep is a practical alternative to expensive benchtop systems, combining the versatility and value of a handheld repeater pipette with a unique non-contact dispense option that ensures repeatable accuracy and reduces the risk of cross-contamination.

Accuracy and Performance

Dispense 100 nL to 50 mL with a Single Pipette

Insert a syringe tip into NanoRep and you're equipped to automatically dispense up to 1,000 aliquots – with no contact necessary from vessel to vessel. Experience Rainin quality in an ergonomic, durable repeater pipette.

Features

- Lightweight, comfortable grip
- Transfer volatile, viscous and dense liquids
- No Touch Off dispense
- Aliquots as low as 100 nL, with increments as low as 10 nL – down to 1/10,000th the nominal volume of any syringe tip
- Up to 1,000 aliquots from one aspiration
